WORLD POPULATION: 1984

Recent Demographic Estimates
for Countries and Regions
of the World

ISP-WP-84

Issued November 1984

This publication presents estimated and projected midyear population for every fifth year, 1950 to 2000, for the world and its major regions; estimated and projected midyear population for 1982, 1983, and 1984 and growth rates for 1982-83 and 1983-84 for all countries and regions of the world; and projected crude birth and death rates for 1984 for all countries and regions of the world.

With an estimated 4.8 billion inhabitants, the world population in 1984 was 29 percent larger than in 1970 and 57 percent larger than in 1960. The world's population growth rate has leveled off since the mid-1970's (around 1.7 percent), but an increasing number of people have been added each year because of the growing population base. An estimated 80 million people were added in the 12 months ending June 30, 1984. By the turn of the century, it is expected that the world's population will be about 6.2 billion inhabitants, or 29 percent greater than the current population.

Differential growth rates among the regions have resulted in a gradually shifting distribution of population over the last three decades, so that the share of the world's population in Africa, Asia, and Latin America has been growing and the share in

Northern America, Europe, and the Soviet Union has been diminishing. This trend is expected to continue into the next century.

Over half of the world's population (52 percent) lives in the five largest countries (Mainland China, India, the Soviet Union, the United States, and Indonesia). These countries are expected to make up 49 percent of the world's population in 2000.

By far the largest population is found in Asia, with an estimated 2.8 billion in 1984, up from 1.4 billion in 1950. The populations of both Africa and Latin America, 532 million and 389 million, respectively, in 1984 are more than double what they were in 1950.

Complete documentation for the estimates shown in this report, including worksheets and other notes on all sources considered, is maintained at the U.S. Bureau of the Census.

Data presented in this publication supersede previous estimates published by the Census Bureau and are themselves subject to revision as new information becomes available. The reader is especially cautioned against using figures presented here in conjunction with figures presented in previous Census Bureau publications or other sources to develop time series.

current population reports

from the BUREAU OF THE CENSUS

In addition to the findings of the Census of Population, conducted every 10 years, the Bureau of the Census publishes continuing and up-to-date statistics on population counts, characteristics, and other special studies of the American people. Data are issued in the seven separate series of reports described here and are released under the general title, Current Population Reports.

P-20 Population Characteristics. Current national and, in some cases, regional data on geographic residence and mobility, fertility, educational attainment, school enrollment, marital status, numbers and characteristics of households and families, and persons of Spanish origin. Approximately 20 reports each year.

P-23 Special Studies. Reports on methods, concepts, or specialized data. Included in the series are periodic reports on the Black population, metropolitan-nonmetropolitan population, American youth, the older population, and other topics.

P-27 Farm Population. Data on the size and selected characteristics of the farm population of the United States. Issued jointly with the Bureau of the Census and the U.S. Department of Agriculture. One report each year.

P-60 Consumer Income. Information on the proportions of families, individuals, and households at various income levels. Data are also presented on the relation-

ship of income to age, sex, race, family size, education, occupation, work experience, and other characteristics. A special annual report provides detailed information on low-income families and individuals. Four to five reports each year.

P-25 Population Estimates and Projections. Includes monthly estimates of the total population of the United States; annual mid-year estimates of the population of States by broad age groups; and of the United States by age, race, and sex; annual estimates of the components of population change. Annual estimates of the population of metropolitan areas and their component counties will be released, as well as projections for the United States and individual States. Generally, about 23 series P-25 reports are published each year.

P-26 Local Population Estimates. Annual county population estimates, most of which are produced under the auspices of the Federal-State Cooperative Program for Local Population Estimates, are published in the P-26 reports individually for each State (50 reports). Also published individually in the P-26 series, on a biennial basis, are the subcounty revenue sharing estimates for each State (50 reports). These estimates were published previously in the P-25 series. In addition, annual estimates of the population of Puerto Rico municipios will also be published. There will be approximately 100 reports published in this series.

P-28 Special Censuses. Presents results of population censuses taken at the request and expense of city or other local governments. Biannual summaries showing the total population figures for all the censuses conducted during the particular period as well as individual reports issued for areas of 50,000 or more, showing the population by age, sex, and race, are available separately. See "How to Order Reports."

HOW TO ORDER REPORTS

Current Population Reports are sold as two separate subscriptions. Series P-20, 23, 27, and 60 (Population Characteristics, Special Studies, Farm Population, and Consumer Income) cost \$71 a year (\$88.75 for foreign mailing). The second subscription, Series P-25 (Population Estimates and Projections) is priced at \$25 a year (\$31.25 for foreign mailing). Release of the P-26 Series and single copies of the individual Series P-28, Special Censuses, must be ordered separately through the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Prices vary.

For information concerning subscription pricing on Current Population Reports, write to Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233.
